# DESIGN THE VISION. CODE THE REALITY. BECOME THE ARCHITECT.

## MODULE 1:

### The Design Blueprint (UI/UX & Graphics)

Focus: Master the visual language before writing a single line of code.

- **Canva:** Rapid prototyping, social media assets, and branding basics.
- **Figma:** Wireframing, high-fidelity UI design, auto-layouts, and design systems.
- **Design Theory:** Color psychology, typography, and spacing (The 8pt Grid).

## MODULE 2:

### The Foundation (Core Web)

Focus: Building the structural integrity of the web.

- **HTML5:** Semantic tags, SEO structure, and accessibility.
- **CSS3:** Flexbox, CSS Grid, animations, and responsive design.
- **Tailwind CSS:** Utility-first styling, rapid UI development, and custom configurations.

## MODULE 3:

### The Engine (Modern JavaScript)

Focus: Logic, interactivity, and the heart of web applications.

- **JavaScript (ES6+):** DOM manipulation, Async/Await, Fetch API, and Functional Programming.
- **Git & GitHub:** Version control, branching strategies, and collaborative coding.

# YOUR IDEAS SHOULDN'T STAY IN FIGMA. BRING THEM TO LIFE WITH THE MERN + NEXT.JS STACK

## MODULE 4:

### The Framework (Frontend Mastery)

Focus: Scaling applications with component-based architecture.

- **React.js:** Hooks (useState, useEffect), Props, and State Management.
- **Next.js:** Server-side Rendering (SSR), Static Site Generation (SSG), and File-based Routing.

## MODULE 5:

### The Infrastructure (Backend & Database)

Focus: Managing data and server-side logic.

- **Node.js & Express.js:** RESTful API development, Middleware, and Authentication.
- **MongoDB:** NoSQL database design, CRUD operations, and Mongoose schemas.

## MODULE 6:

### The Launchpad (Deployment & DevOps)

Focus: Taking the project live to the world.

- **Vercel:** Deploying Next.js apps with CI/CD pipelines.
- **Netlify:** Hosting static sites and serverless functions.
- **Production Readiness:** Environment variables, performance optimization, and monitoring.
